Instructions: Enter the answer given by the participant for each response. Set CDART Field Status to 'Refused', 'No Response', 'Missing', etc. for those questions that do not list these values as possible answer choices. After obtaining the participant's witnessed signature on the informed consent document during the visit, key the responses on this screen from that document. Enter only one form per participant. If any aspect of consent is modified by the participant at a later date (such as a new restriction) update the completion date and staff ID fields to reflect the time of that change and who recorded the change in consent.
